## Helpful ideas before we treat your home

Before we treat your house for pests we need your help so we can obtain the best results possible. We put safety first and use environmentally safe products but we still must take care when using them. It depends on what treatment you may require to what you can do. Here are some things that can be done before we arrive to treat your house for general pests.

- General cleaning in and around kitchen cupboards if infested by cockroaches
- Remove pets and turn upside down their water and food bowls
- Pick up toys and items outside in areas that need to be sprayed for spiders and other pests eg cubby house, entertainment areas
- We spray along your skirting boards so please remove clothing, toys etc from these areas. The more we spray, the better effect
- We need access to the manhole so we can treat inside your ceiling
- Close windows
- Please inform us if you have a fish pond
